#### What were the Fund's costs for the last year?

(based on a hypothetical \$10,000 investment)

Class Name	Costs of a \$10,000 investment	Costs paid as a percentage of a \$10,000 investment
Class I	\$161	1.51%

#### How did the Fund perform during the reporting period?

The Tactical Dividend and Momentum Fund ("the Fund") was fully invested for the majority of the annual reporting period (8/1/2024 – 7/31/2025). During the reporting period, Class I shares had a total return of 13.20%. The Fund remained invested during the steep early April drawdown, which was caused by the announcement of tariffs on U.S. trading partners. The Fund's portfolio management team viewed the pullback as a temporary reaction and sought to remain invested in U.S. equities amidst a positive economic and earnings environment. This view proved accurate as the S&P 500 and the Fund quickly rebounded from most of the tariff-driven selloff and reached new all-time highs by 6/30/2025.

The Fund is benchmarked against the S&P 500 Total Return Index, which returned 16.33% over the same period. The Fund reduced sector exposure to Healthcare and Materials stocks on 5/28/2025 and remained uninvested in these two sectors as of 7/31/2025. The decision to exit these sectors was primarily driven by tactical price-based momentum indicators. As of 7/31/2025, the Fund remains 89.3% invested in US equities with 10.7% in cash and equivalents.
