

Began Operations:

September 10, 2015

Investment Objective:

The Fund seeks to provide capital appreciation and current income.

Principal Investment Strategies:

The Fund follows, when appropriate, a rules-based investment strategy, that includes both a sector tactical overlay and ranking selection strategy among the eleven major economic sectors in the U.S. economy. The Adviser may also exercise its discretion in applying the rules based investment strategy, when, in its opinion, a discretionary management approach would be more appropriate. These eleven sectors include: communication services; consumer discretionary; consumer staples; energy; financials; health care; industrials; information technology; materials; real estate and utilities.

When Sector(s) are on a "Buy":

When the tactical algorithms determine that a sector is on a "buy," the Fund may invest in any number of the highest dividend yielding and highest momentum stocks from that particular sector. Dividend yield is determined as the total of all trailing 12-month regular dividends, divided by the current market price for each stock. A ranking by dividend yield of all stocks in the sector is made and the highest dividend stocks may be selected. Momentum is determined by a proprietary factor calculation of the rate of change for each stock over the prior 64 day and prior 18 day time periods. A ranking by momentum of all stocks in the sector is made and the top momentum based stocks may be selected. The Adviser selects the stocks as of the date of the initial investment or tactical reinvestment in the sector. The Adviser may also elect to remove or replace any number of the stocks at any time. When a sector is on a buy, the Adviser may invest all or a portion of the allocation into that sector, up to its market cap weighting, into any combination and weighting of individual stocks or Exchange Traded Funds ("ETFs"). When all eleven sectors are on a buy, the Fund may be fully invested in a combination of stocks and ETFs in each sector. Under these circumstances, the Fund will invest up to a market cap weighted amount of its assets in each of the eleven sectors. The market cap weight amount of each sector shall be determined by the percentage that the individual sector is represented in the S&P 500 Index as of the end of the previous calendar month. Under certain circumstances, the Fund may be over weighted in one or more sectors because of market appreciation or if the Adviser believes that different weightings are appropriate. The Adviser may also choose to invest into the entire sector by buying an ETF representing all constituent stocks of that sector that are in the S&P 500 or in one or more ETFs representing a portion of a sector.

Portfolio Managers

John J. ("Sean") Hanlon, IV, CFP®
Co-Portfolio Manager

Sean Hanlon is the Co-Portfolio Manager of the Tactical Dividend and Momentum Fund, which launched in September 2015. He was also the Chief Investment Officer of VestGen Investment Management, which previously was called Hanlon Investment Management and was founded in 1999. Sean's experience includes roles at Merrill Lynch and Paine Webber in their wealth management divisions. Mr. Hanlon has served on the advisory board of various financial services companies and is an active investor in, and serves as an advisor to, numerous private equity and venture capital investments. Mr. Hanlon is a member of the Stevens Institute of Technology Board of Trustees, is the former Chair of the Investment and Finance Committees and is Chairman of the Advisory Board for the Hanlon Financial Systems Center at Stevens. He graduated with a B.E. in Mechanical Engineering from Stevens and later earned a Certified Financial Planner (CFP®) designation.

George Peller III
Co-Portfolio Manager

George Peller is the Co-Portfolio Manager of the Tactical Dividend and Momentum Fund and the Executive Director of Investments at VestGen Investment Management, which was formerly known as Hanlon Investment Management. George has served in a leadership role in the research department since 2013. In prior roles, George specialized in Alternative Investments at BlackRock and Wells Fargo. George graduated with honors, Cum Laude, from La Salle University in 2003 with a major in Finance and a minor in Risk Management and Insurance.

TACTICAL DIVIDEND AND MOMENTUM FUND

Symbol	Class	CUSIP	Max. Sales Charge (Load)	Max. Deferred Sales Charge (Load)	Mgmt. Fee	(12b-1) Fee
HTDAX	A	90213U370	5.75%	None	1.00%	0.25%
HTDIX	I	90213U354	None	None	1.00%	None
HTDRX	R	90213U347	None	None	1.00%	0.40%
HTDCX	C	90213U362	1.00%	1.00%	1.00%	1.00%

When Sector(s) are on a "Sell":

When the tactical algorithms and the Adviser, in its discretion, determines that a sector is not on a "buy," the Fund will move to a defensive position with respect to that sector, and will hold cash and/or cash equivalents instead of investing in stocks or ETFs from the sector. When none of the sectors is on a buy, the Fund will be fully defensive, meaning that all of the Fund's assets will be invested in cash and/or cash equivalents. Accordingly, the Fund may invest all or a substantial portion of its assets in cash and/or cash equivalents, and may invest in a smaller number of holdings.

What are the Risks?

Equity securities are susceptible to general market fluctuations and volatile increases and decreases in value as market confidence in and perceptions of their issuers change. A company that has historically paid regular dividends to shareholders may decrease or eliminate dividend payments in the future, which could result in a decrease in the value of the company's stock and lower performance of the Fund. An investment in securities with positive momentum entails investing in securities that have had above- average recent returns. These securities may experience greater price volatility than other equity securities, which may negatively impact the investment performance of the Fund.

The Fund may be subject to the risk that its assets are invested in a particular sector or group of sectors in the economy. To the extent the Fund invests in a smaller number of holdings, the Fund may be more adversely impacted by changes in the price of individual holdings than funds with a greater number of holdings. A rules-based investment strategy may not be successful on an ongoing basis or could contain unknown errors. The value of a specific security can be more volatile than the market as a whole and may perform worse than the market as a whole.

Mutual Funds involve risk including the possible loss of principal. There is no guarantee that any investment strategy will achieve its objectives, generate profits or avoid losses.
